Exercise 39: Dictionaries, Oh Lovely Dictionaries

You are now going to learn about the Dictionary data structure in Python. A Dictionary (or "dict") is a way to store data just like a `list`, but instead of using only numbers to get the data, you can use almost anything. This lets you treat a `dict` like it's a database for storing and organizing data.

Let's compare what can dicts can do to what lists can do. You see, a list lets you do this:

Ready To Learn To Code?

If you enjoyed the sample so far, then you can continue learning by purchasing [Learn Python 2 The Hard Way (http://bit.ly/buypython)](http://bit.ly/buypython), or [Buying Learn Python 3 The Hard Way for 29.99 (http://bit.ly/buylp3thw)](http://bit.ly/buylp3thw). You'll receive all 52 exercises in PDF and HTML formats, plus videos teaching you each exercise. This course has helped **12 million** people learn to code since 2010, so it can help you too. If you want to see more samples then try the [Appendix A: Command Line Crash Course (/python3/appendixa.html)](/python3/appendixa.html). **If you already purchased this book then you can download the videos at account page**

(https://shop.learncodethehardway.org/customers/) or view the paid HTML version (https://shop.learncodethehardway.org/paid/python2/).

Need To Learn For Free?

My Learn Ruby The Hard Way (https://learnrubythehardway.org/book/) is still free to read for anyone who needs to learn to code. Ruby is a perfectly fine alternative to Python, and works just as well as a first language. If you can't afford Learn Python The Hard Way (https://learnpythonthehardway.org/book/) then read Learn Ruby The Hard Way for free (https://learnrubythehardway.org/book/).

Buy The Python 2 Course

When you buy directly from the author, Zed A. Shaw, you'll get a professional quality PDF and hours of HD Video, all DRM-free and yours to download.
